*Late submissions will **not** be accepted and will be **disqualified**.*

*Your presentation should **follow these guidelines**.*

*You **do not need to answer every sub-question**—cover only what is relevant to your solution.*

1) The Problem

What real problem are you solving?

Example:

- What is happening today?
- Why is it a problem?
- Who is affected?

2) Our Solution

What did you build?

Example:

- What the system does
- One key capability

3) How It Works (Simple Flow)

Explain like you're talking to a non-tech person

You must explain:

- Input → Decision → Output
- No algorithms, no jargon

4) Proof It Works (15 seconds)

Evidence

You can show or say:

- Demo
- Test result
- Real example

5) A Nuance You Handled That Others Might Miss

What subtle issue did you explicitly design for?

Examples:

- Mixed language audio/messages
- Over-polite scam messages
- Human voices that sound robotic
- Repeated scam attempts in one session

6) A Trade-Off You Made (and Why)

What did you choose not to optimize?

Examples:

- Accuracy vs latency

- Aggressive detection vs safety
- Engagement depth vs containment

7) A Failure Case You Can Explain Clearly

Where Does Your System Struggle Today?

Examples:

- Certain accents
- Very short conversations
- Novel AI voice models

Scoring Overview:

<i>Evaluation Parameter</i>	<i>Score</i>
<i>Problem–Solution Clarity</i>	<i>20</i>
<i>Solution Innovation & Design</i>	<i>15</i>
<i>Technical Approach (High-Level Explanation)</i>	<i>20</i>
<i>Real-World Impact & Applicability</i>	<i>15</i>
<i>Demo & Proof of Work</i>	<i>20</i>
<i>Communication & Pitch Quality</i>	<i>10</i>
<i>Total</i>	<i>100</i>
